

we build it **better**

success story multifamily

project description

A large, late season hail storm blanketed much of the Denver-metro area on September 29, 2014. Palomino Park Resorts, one of Denver's largest multifamily communities, was in the path and sustained severe damage.

project focus and challenges

Our sole focus was the residents of Palomino Park, as this property is one of Denver's premier resort-style communities. Minimizing resident impact was our biggest challenge due to the size of the property and its limited access as a gated community. Performing on an aggressive schedule in late fall was extremely important in order to meet the project's timelines.

success and results

BluSky's roofing division completed the roofing and gutter replacement of all 172 buildings in 6 weeks of production—a pace that is unmatched in our industry. Our "off-and-on-in-one-day" approach for each building provided outstanding service to the owners and residents, allowing them to be impacted only one day during construction of their building.
