

CAPABILITIES

restoration

We specialize in large-loss projects that require emergency response anywhere in the United States – we're available when you call 24/7/365.

UNIVERSITY TORNADO RESTORATION

GAMECOCK VILLAGE, JACKSONVILLE STATE UNIVERSITY – JACKSONVILLE, ALABAMA

CONTRACT VALUE \$24 MILLION

A powerful F-3 tornado devastated 11 buildings at Gamecock Village, requiring immediate reconstruction, including large-scale structural drying and mold remediation.

- Original contractor was released from the project, as they did not have the ability or capacity to complete the work
- Completing the work to make the campus safe and operable for students and faculty by opening day appeared impossible by all, except BluSky
- Nationwide supply chain of trade partners, suppliers and BluSky personnel were coordinated to substantially complete this project in 4 months working seven days a week
- Work was completed on the 500-room student housing complex in time for the start of the fall semester student move-in

renovation

With thousands of capital improvement projects under our tool belt, we can tackle virtually any commercial renovation request.

MULTI-FAMILY RENOVATION

THE RIDGE AT THORNTON STATION - THORNTON, CO

CONTRACT VALUE \$2 MILLION

Newly developed multi-family property experienced water intrusion issues on concrete patios into residences and garages.

- 10 Multifamily Structures
- Retained by owner to perform intrusive observations alongside forensic engineers to determine the water intrusion issues
- Developed repairs scope of work in collaboration with engineer that resolved issues and fit within existing building conditions
- Operated continuously in foul weather conditions, on an accelerated schedule, to complete repairs prior to sale of the asset

environmental

The Environmental Services division at BluSky focuses on providing testing, inspections and cleanup for asbestos, mold, and other biological contamination of commercial properties.

CONSTRUCTION DEFECT ENVIRONMENTAL SOLUTION

WEYERHAEUSER FLAK JACKET® REMOVAL - NATIONWIDE

CONTRACT VALUE \$117.5 MILLION

1000+ properties affected by construction defect caused by chemical contaminant. Scope of defect required BluSky to deploy dozens of suppliers and trade partners from across the nation and train hundreds of technicians.

- Properties affected are nationwide, but primarily located in Colorado, Minnesota and several states in the Northeast
- Hundreds of properties were occupied, requiring compassionate and sensitive handling of the mitigation process
- BluSky developed a customized mitigation solution that was fast, environmentally friendly and restored the properties safely for occupation and sale
- Restoration project completed in 6 months

roofing

Low-slope roof or sloped – BluSky has you covered. To move forward with repair or replacement, we will work with insurers and property owners and managers following generally accepted industry guidelines.

HOSPITAL ROOF REPLACEMENT

MORTENSON/SCL HEALTH LUTHERAN MEDICAL CENTER - WHEATRIDGE, COLORADO

CONTRACT VALUE \$5.5 MILLION

Roofing 240,000 square feet on 80 different roofing decks at this fully functioning hospital presented many challenges. As work began, asbestos was discovered requiring extensive abatement.

- BluSky continued work unfazed ensuring safety of patients, staff and work crew even during challenging winter months
- Roofing was completed meeting all environmental standards without a single safety incident, on time and on budget
- Utilizing real-world pricing without relying on insurance pricing models, BluSky saved the client's insurance company over \$1 million
